DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-7, 11-13, 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Jones (US 6,059,032).

The well injection string is met by injection string shown in Figs 1 and 2, which comprises at least one fluid outflow zone 20 having one or more through-going pipe wall openings 15 located opposite to the reservoir or treatment interval 12. Wherein:

- The at least one pressure-loss-promoting flow control device is anticipated by nozzles installed in openings (col. 4, lines 19+).
- The sealing plug is anticipated by ball valve, which functions as a sealing plug.
- The removable and replaceable insert is anticipated by the nozzle which is known to be of various sizes and removable.

Allowable Subject Matter

Claims 4, 8-10, 14, 18 -20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 21-34 are allowed.
